

TR 2023-10 – Line Markers

TR Number	23-10
Primary Reference	192.707
Purpose	Update GM to regarding conversion of service, and delete the reference to natural gas.
Origin/Rationale	Conversion of service according to 192.14 is not the only way to change the product in a pipeline. 191.22(c)(vi) discusses both conversion under 192.14 or a change in commodity carried in a 192 pipeline. With the increased interest in hydrogen or carbon dioxide, conversion is no longer just a change to natural gas.
Assigned to	O&M/OQ TG

Section 192.707

1. ~~GENERAL~~

- (a) If an existing pipeline has undergone a conversion ~~to service (see §192.14) or other change of product transported, the , its pipeline~~ markers should ~~be updated to~~ accurately list ~~natural gas as~~ the product ~~being transported~~.
- (b) See Guide Material Appendix G-192-13, Section 3.
